Annual Advance Summary  
Supplement

### DIRECTORY OF PRINCIPAL U.S. GEMSTONE PRODUCERS IN 1991

A total of 395 operations located in 41 states were reported as producers of gemstones in 1991 according to the Bureau of Mines, U.S. Department of the Interior. Preliminary estimates of production were \$109 million of natural gemstones and \$19.2 million of synthetic and simulant gemstones. The materials included natural, synthetic, and simulant gemstones, and also included natural and cultured freshwater pearls, mother-of-pearl, mussel shell, and coral. They were used in the manufacture of jewelry, objects of art, and were sold to gem and mineral collectors.

In 1991, production of U.S. natural gemstones included agate, agatized coral, azurite, benitoite, beryl (aquamarine, bixbite, emerald, heliodor, andmorganite), chrysocolla, coral, diamond, feldspar, fire agate, flint, freshwater mussel shell and pearls, garnet, jade, jasper, kunzite, lapis lazuli, malachite, mother-of-pearl, obsidian, onyx, opal, peridot, petrified wood, quartz (amethyst, rock crystal, rose, and smoky), rhodonite, ruby, sapphire, thomsonite, topaz, tourmaline, and turquoise.

Synthetic and simulant gemstones produced in the United States included alexandrite, amethyst, citrine, cubic zirconia, emerald, garnet, red coral, rock crystal, sapphire, spinel, and turquoise.

Freshwater mussel shells and pearls were produced from the rivers and lakes of the following states; Alabama, Arkansas, Georgia, Illinois, Indiana, Iowa, Kentucky, Louisiana, Minnesota, Missouri, Nebraska, North Dakota, Oklahoma, South Carolina, South Dakota, Tennessee, Texas, and Wisconsin.
